

Welcome to the PCAssistant Demonstration

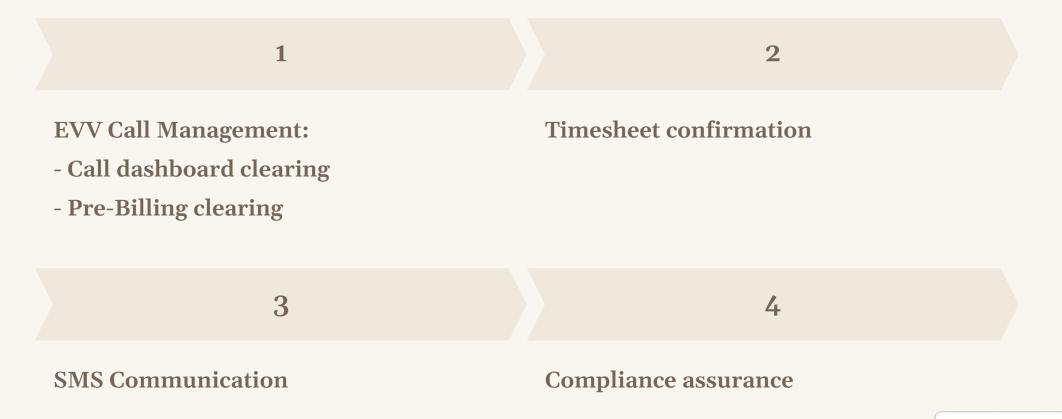

PCAssistant

Our mission is to assist homecare agencies that utilize HHAExchange as business management and operating software to drastically cut operating costs, while optimizing business management and operation. The services we offer are fully customized to your needs in essence, we automate the procedure you currently implement. Our program is designed to significantly lighten your office employee workload load, while improving the work quality and efficiency, allowing you to cut your costs and improve billing, while concentrating on growing your business.

Services offered

In the environment of mandatory EVV compliance, efficient management of EVV clock in and clock out is paramount. Our program is designed to make the EVV compliance flawless and efficient. Our goal is to improve the EVV compliance by your caregivers and to manage all received calls to facilitate an easier billing process.

The first step in our process is improving the discipline of your caregivers when it comes to EVV compliance. Our SMS system detects the missing clock in or clock out, and prompts your employee to clock in/clock out in real time. The prompts continue to go out periodically until the call is received.

All calls that are not linked by EVV and enter Call Dashboard are handled in accordance with the approved procedure. Our program is capable of matching such calls to the schedule and adjust visit schedule and clock in/clock out time to avoid prebilling issues. The calls are linked or rejected as appropriate.

Finally, the calls that are linked by EVV but create Pre-Billing problems are handled in accordance with the approved procedure. Our program is capable of matching such calls to the schedule and adjust visit schedule and clock in/clock out time to repair prebilling issues such as unbalanced or overlapping visits. Our program confirms the POC duties with your employees and assures POC compliance. The program is cable of handling 24-hour and 12/12 hour split shift visits.

Our system may be customized to send EVV compliance reminders to caregivers at the time the EVV compliance is required.

1

SMS Reminder

1

PCAssistant detects missing EVV clock IN/Outs and addresses them as they post on HHAExchange.

Timesheet Confirmation

While the EVV compliance is mandatory, every agency is faced with the fact that 100% EVV compliance is not attainable. Obtaining, confirming and entering timesheets for visits with missed EVV is a tedious, time and labor consuming process. Our program makes this process as seamless as possible.

First step is detecting visits with missed EVV that require a timesheet. We detect visits with missed EVV and prompt the scheduled PCA/HHA to provide a timesheet for such visit.

3

The timesheets may then be received and confirmed by your agency, at which point we would enter such timesheets into HHAExchange, creating a billable visit.

We may also collect and verify such PATENT ROOM timesheets electronically, and then enter them into HHAExchange, creating a billable visit.

6 Made with Gamma

Timesheet Confirmation Demonstration

1

In pre-billing, PCAssistant detects visits missing EVV confirmation.

Timesheet Confirmation Demonstration

4

The client has the following options:

- 1. Client receives and confirm the timesheets, and instruct PCAssistant to automatically enter the timesheet information into HHAExchange database creating a billable visit, or
- 2. PCAssistant collects electronic copies of timesheets, confirm them and enter the timesheet information into HHAExchange database creating a billable visit.

Compliance Assurance

Compliance is paramount. Our program is designed to ensure that your Agency will never miss an upcoming compliance item expiration. We detect a deadline on medical or I-9 compliance for your caregivers. We then send an SMS prompting that caregiver to provide the updated information. Simultaneously, an SMS is sent to your designated office employee informing such employee of the nearing deadline. We can customize this process for deadlines, for any compliance item your Agency enters into HHAExchange, such as In-service education or nurse visits. Compliance Assurance process eliminates human error and tardiness in pulling and checking compliance reports.

Conclusion

2

3

Enhanced Efficiency

Streamlined processes for improved operational efficiency and time management.

Enhanced Communication

Effective communication channels leading to better coordination and client satisfaction.

Enhanced Compliance

Improved compliance measures ensuring the highest standard of care for clients.

Exclusions

While we are able to handle 99.5% of all calls and visits in call dashboard and pre-billing, we cannot completely remove the human factor. We are not able to handle the following, as human error requires human involvement:

- 1. Any visit that have a blank schedule
- 2. If the schedule indicates a "missed" visit for any caregiver visit on that date
- 3. Any scheduling errors
